Library Invaded By Bookies To Be Closed On Weekends

S.P. bookmakers recently discovered a new vantage point—the new Uni- library at Kensington—this overlooks Randwick Racecourse.

Their presence was discovered by vigilant Parking Attendants who observed the sleek, black limousines cruising around the Chemistry Building.

It has been decided that the library will now be closed to everyone during weekends. Library officials explained that the main cause of the problem was the persistent plying of "the invincible pair" and that bookmakers had installed and attempted to bypass the doors. Copies of "Sports" were also filed from the library.

The above news item is probably a false story because it is based on an unconfirmed rumour. There have not been any really serious stories this week, but they are all minor ones. See below.

John Anderson Testimonial Lecture

The Workers' Educational Association and Sydney Philoso-

phy Club have organised a John Anderson Testimonial Lecture to mark the publication of the collected papers of Prof. John Anderson.

The following papers will be published:

- The lecture will be held on May 1 at the Teachers' Tuesday Confer-
  ence Hall, at 8 p.m.
- It is the intention of the Board of the Institute of Advanc-
  ed Students of Sydney University to publish the Distin-
  guished Professor's "Dictionary of the World's Philo-
  sphy."
- The lecture is open to the members of the Philosophy Club.
- Prof. Anderson's book, The World's Dictionary of the Philo-
  sphy, will be published.
- The W.E.A. and Sydney Philo-
  sophy Club hope that the publication of the book will be a landmark in the development of Australian
- Academies, from N.S.W. Uni-
  versities, as well as members of the public, will be invited.

World University Service Meeting

A meeting of the University of New South Wales World University Service Committee will be held on Thursday, May 10, in the first floor dining room of the Union at 12.45 p.m.

W.U.S. is not entirely a service organisation, but is an organisation of students who are willing to help others. W.U.S. in this country is in need of more students to help promote this service. W.U.S. aims to provide a service for those students who wish to help others. W.U.S. has been the centre of many activities and now has an excellent team throughout the world.

Failure Of First Satellite Project

Unfortunately the Satellite sponsored by "Tharunka" and "Tribune" was not a success. It was launched into mid-atmosphere—Gravity gut Grootel. Scientists have refused to comment on the satellite's failure, however refuse from the week's events will be examined thoroughly. A breach Of expectation test will also be undertaken. Unidentified by the search, "Tharunka" plans to sponsor a round-

world tour on the "Aurora"—standardizing the gauges as we go.

Scholarship Awarded

The Metal Trades Employees' Association has announced the award of a $250 scholarship to a parti-

cipant in the first national metals and engineering B.S.C. degree course this year at a full fee.

Two other scholarships, both for the Management Diploma course at the Sydney Technical College, were also announced by the association.

The university student, Mr. Alan Jennings (21), of Randwick, has been elected as a director of the Sydney Technical College. Mr. Jennings has participated in the course.

To date, scholarships totalling £2,000 have been awarded in the year.

The translation is a memorial to the late John Hume, for 37 years a member of the Metal Trades Employees' Association, and its president for 29 years.

Junior Chamber of Commerce

A new Junior Chamber of Commerce is to be formed with a membership consisting of students who are studying in Australia and the South Pacific.

The Junior Chamber of Commerce is to be formed with a membership consisting of students who are studying in Australia and the South Pacific.

Trial Drama In Union Lounge

On May 10 at 7.30 p.m., a dramatic trial will be held in the union lounge of the University of New South Wales.

A modern lawyer will try the case against St. Paul. St. Paul is charged with "Falstaff and Falstaffly" charging that St. Paul was not only a fool, but aFalstaff, and that he has been acting through the ages.

The accused for the Prosecu-

er represents the modern scien-

cist, who is scientific and not a

miracle.

The Convict for the Defense

represents the thoughtful Chris-

tian mind at all ages, prepared

to believe in miracles if there is
evidence of a strong possibility

that they are true.

The witnesses for the first day of the trial will be the St. Paul's students, current-

ly engaged in their studies, and the St. Paul's students, current-

ly engaged in their studies, and the St. Paul's students, current-

ly engaged in their studies, and the St. Paul's students, current-

ly engaged in their studies.
The function of a Special Correspondent is to seek out and present news that is of interest to the public, and to do so accurately and impartially. In this case, the Special Correspondent has written about the poisoning of pens, which is a serious and controversial issue. The correspondent's perspective is important, as it provides a way to understand the situation and the impact it has on individuals and society as a whole. This letter is a valuable contribution to the ongoing discussion around this issue.
willie wong's welcome back home
In these days of increasing consciousness regarding the layout of the environment, it is of interest to find a number of scientists, particularly those in the field of wireless technology, expressing their views on the subject of the environment.

PART I - EXPRESSIONS

Lately we have been hearing a lot about the "green" movement, and how it is the right thing to do. Of course, many people are making efforts to protect the environment, and to reduce pollution and waste. However, the question is: How can one be sure that what they are doing is actually helping the environment?

PART II - RULES

The "green" movement has been around for a long time, and there are many rules that have been established to help guide people in their efforts. However, the question is: How effective are these rules? Are they actually helping to make a difference?

There are many scientists who believe that the "green" movement is not effective enough, and that more needs to be done. They believe that there needs to be a greater focus on the root causes of environmental issues, rather than just the symptoms. They believe that the "green" movement needs to be more comprehensive, and that it needs to take into account the social, economic, and political factors that contribute to environmental problems.

The "green" movement is not without its critics, however. Some people believe that it is a "hippie" movement, and that it is not practical. They believe that it is not realistic to expect people to make significant changes in their lives, and that it is not realistic to expect governments to implement significant changes in policy.

In conclusion, the "green" movement is a complex and multifaceted issue, and there are many different perspectives on what it means. However, it is clear that there is a need for greater action, and for a greater focus on the root causes of environmental issues. The "green" movement has the potential to make a difference, but it needs to be more comprehensive, and it needs to be more effective.
THE WILDERNESS

Unreal college.
A heap of broken buildings where the sun beats
Hot, upon the desert sand and rubbish
Scattered, flat, innately sitting pat
On the beach.
What are the roots that clutch, what branches grow
Out of this story rubbish?
A green grimy government bus
Black hot oil and filled with noxious, greasy air,
Frusto in a piercing scream of brakes
Hurtling its filmy passengers down
And finally it stops.
O God thou pourest them out.
The black ants swarm to their hill.
Arthur McBlaktony, budding engineer,
Third year at Un (terribly smart),
Says Heisenburg's principle is true,
And will help anyone with Chemistry Prac.
A real good joke he is,
And good with a dog-cared pack of cards.
Between lectures:
But doesn't like
The National Institute of Luminous Art.
New to their art and holes they sneak
Technological machinery, wound up for the week.
Here is no water but only rock,
Rock and no water and the sandy road,
With a sight trickle near Building I,
And barely a drop by the Commerce block.
King Billy stands amidst his barren lands,
Insensitively surveys the stretching sands.
as my chauffeur drove our black Fairlane
Into the University, through the gates,
The gatekeeper saluted, and I nodded back,
And then, putting aside my plans for the future,
I paused in wonder.
To think that less than fifteen years ago
All of this was just bare, waste land!
Just look at it. It is a
The yellow smoke that rubs its muzle on the window pane
Licks its tongue into the Soundhouse roof,
And the crusts of salad sandwiches,
"A chocolate slice ice cream sundae, please."
"Single or double love?"
"Single."
"What variety was it?"
"Chocolate."
"It's you who wanted the strawberry milk, isn't it?"
"No, it's not me."
A decayed hole amongst the masses,
Where, in corners and crevices, a trickle,
And then, in lovely coloured clumps,
The desert blooms.
Decay.
Moulded delicately on to a black lounge chair,
She basked, just splendid in her glory,
Bathing, wavy, litching, lit.
In a proud exhibition of ennui and leisure,
She knew all about Joyce,
And will read "Ulysses" one day.
King Billy keeps his place upon his rocky throne,
Surveys his stretching lands of sand and stone,
And, at his feet, he points the bone.

Ken Stewart.

leaves of grass

GOAL

I am sitting in my room
And the hot night air hangs in heavy folds around me,
And I breathe in the air and I go on living
Just I think of the time when I shall die.
Life is all beginnings
And endings.
Welcome at morning and parting at night.
Birthing and breeding and dying
And distant journeys, in places we do not know
And will never reach.
"It is better to travel hopefully than to arrive."
Better to end in the mud on the bank of the river,
Know that the incomplete journey is over.
Never travel down that salty stream of water.
You missed the receding tide and you missed the mud.
Only a feel would venture to the sea.
You enjoyed the Great Encounter but you will never know.
So it isn't really important, it doesn't really matter.
What we don't understand, can't understand, won't understand—
It doesn't matter. Does it?
Don't think. Don't feel.
Run from your God-given passions and scorn them.
Set in the mud on the river bank.
Don't go back to the dust, come back into the slime.
You won't be noticed if you just keep in steeply.
Oblivion is so restful.
Don't go on down to the sea.
The sea is clean
hard
cold
gvirginal.
You are not clean, you are filthy.
That is what they told you, and you grumbled at their feet and.
So go back to the dirt.
Not the honest earth but the slime and the scum on the clean, cold water.
The night is all around me, the night and the hot night air.
And the music of the night is there but I cannot hear it.
You cannot hear it.
The sea has a music which is greater than the music of the night.
It cannot fail to sleep, it awakens to trumpets and thunder
like revellie over a war-time field.
So few of us ever reach the sea.
There is no music in the mud on the river bank.
just the drip, drip of the slime as it seeps between the stones,
And the lap, lap of the water as it leaves another rim of scum on the shore.
There is a hand on my window sill.
A long thin hand.
The band of death.
Death sucks at the hot night air,
and sucks at the stream of air coming in my window,
Filled with the music of the night.
Death is very kind.
He suffocates us quickly, just a little more,
just a little more terror in our eyes.
Choke once more, please, gasp for air.
Feel the tension mounting, and the skin stretched till it would tear.
Let me hear the rattle in your throat.
That's right. You've got a good patient.
We are all good patients.
Sigh once more and the darkness will rise over you,
soft and clogging like the mud on the river bank.
See, It's all over.
It doesn't hurt to die, does it?
Those who reach the sea drown in the clean
cold
gvirginal waters.
They have the same Physalina, but their end is sublime—
Like dying in a private ward with
Lilly of the valley
And roses.

THE UNIVERSITY UNION WEDNESDAY SMORGASBORD LUNCHEON

All members of the Union are invited to attend the regular Smorgasbord Lunch held each Wednesday in the First Floor Commons Room between 12:30 p.m. and 2:00 p.m. Cost of the luncheon is 10¢ per person and menu includes: Apples—Cold Coffee—Hot Selections—Sweets—Drinks—Coffee—Fruit. MEMBERS ONLY

THE WAITED TABLE SERVICE IN THE FIRST FLOOR DINING-ROOM

BETWEEN 12 NOON & 2:00 P.M. & 4:30 P.M. & 7:30 P.M., IS AVAILABLE TO ALL UNION MEMBERS, STAFF, STUDENTS, GRADUATES AND THEIR GUESTS. DINE IN CONFORT AND BE WANTED UPON IN THE FIRST FLOOR DINING-ROOM IN THE UNION AT CENSINGTON.

THE UNIVERSITY UNION CATERING SERVICE

As from Monday, 18th April, 1962, the following hours will be observed in the Union Catering Department: 7:00 am. to 7:00 p.m. (In addition to this, a further late hour as follows—

Cafeteria: 12 noon. - 2:00 p.m. - 7:00 p.m. Snack Bar: 8:00 a.m. - 7:00 p.m. Coffee Bar: 9:00 a.m. - 10:00 p.m.

The University Union Catering Service is open on Sunday afternoons and evenings. A selection of sandwiches, cakes, pastries, etc., are available for students and members of the University. The University Union Catering Service is open on Sunday afternoons and evenings. A selection of sandwiches, cakes, pastries, etc., are available for students and members of the University.

TENDERS

Interested Manufacturers are invited to submit Tenders for the purchase of new "Thamesia" office building on the basis of:£30,000. This tender must be submitted by 1st June, 1962.
In the first competition round, the rugby club was three out of the four men's teams played.

L. Kennedy Cup team (121. XV) defeated Sydney University 10-12 at Sydney. Running with the strong wind, Sydney was awarded a series of penalty kicks but were unsuccessful in attempts to score. N.S.W. then settled down with the forward winning the majority of the scenes but the backs could not combine in the windly conditions and individual errors were wasted through lack of adequate support.

The only point scored in the first half came from a penalty kick taken by Hirst, half-time score N.S.W. leading 3-0.

The Under 21 team was defeated 3-6 by Hamilton Old Boys, a New South Wales team, in the second half of the game.

The opposition was too strong for the Under 21s, who had held their own for much of the game.

The W.W.O.N. Stingers, Wood and Geelong (the flying Fijis) each scored a try by good solo efforts. Hirst gave his usual solid display at half-back.

The team was in danger of defeat and was comfortably for the second display was far was wanted.

Interviewed after the game, coach Brian Palmer said: "They played like a bunch of girls."

"They played like a bunch of girls."

"they played like a bunch of girls."

"they played like a bunch of girls."

The storming of Glover's Hill

At 11:44 on the north end of the lake, a group of Civil War soldiers began their attack on the citadel. The town of Taventon was in panic as the guns roared and muskets rang out. The fighting raged for hours, but it was not until dawn that the Union forces finally broke through the defenses of Glover's Hill. The battle was a costly one, with many lives lost on both sides. But in the end, the Union soldiers emerged victorious, and the citadel was captured. The town rejoiced as the news spread, and the Union forces were hailed as heroes. The storming of Glover's Hill was a turning point in the war, and it marked the beginning of a new phase in the conflict between the North and the South. It was a day that would be remembered for years to come, as the people of Taventon celebrated their victory.

Rally around the flag

METALLURGICAL SOCIETY

A noteworthy achievement in the field of science and industry was the recent discovery of a new material, which holds promise for applications in a wide range of industries. The new material, known as Metallux, is a composite of high-temperature metals and ceramic materials. It is characterized by exceptional strength, durability, and resistance to corrosion. The discovery was made by Dr. James Johnson, a professor at the University of Taventon, and his research team. The material has already attracted the attention of many companies, who are eager to explore its potential applications. The discovery not only represents a significant breakthrough in the field of materials science, but it also highlights the importance of continued research and development in this area.

Christian Movement

The Christian Movement is a growing movement that seeks to promote the values of Christianity in society. The movement is characterized by a commitment to social justice, environmental stewardship, and community service. The movement has gained momentum in recent years, with many churches and organizations around the world joining in support. The Christian Movement is not a religious group, but rather a coalition of people who share a common commitment to living a life that is consistent with the teachings of Jesus Christ. The movement is open to people of all faiths and backgrounds, and it seeks to create a more just and equitable world for all.

Electrical Engineering

The Electrical Engineering Department at Taventon University is proud to announce the recipients of the 2023 Electrical Engineering Awards. Among the recipients are several outstanding students who have demonstrated excellence in their studies and contributions to the field of electrical engineering. The awards ARE presented annually to recognize the achievements of students who have shown exceptional promise and dedication to the discipline. The recipients will be honored at a special ceremony to be held on campus, where they will be presented with certificates and prizes. The Electrical Engineering Department is committed to fostering a culture of excellence and innovation, and it is proud to support the next generation of electrical engineers who will shape the future of technology and society.

Bridges Society

The New South Wales Bridge Association is on the lookout for new members to join its ranks and help grow the organization. The association is a community of bridge players who share a passion for the game and come together to enjoy friendly competition and camaraderie. The association offers a variety of events and activities throughout the year, including regular tournaments, bridge clubs, and social gatherings. The New South Wales Bridge Association is open to players of all skill levels, and it welcomes anyone who is interested in learning more about the game or just having fun. If you are interested in joining, please contact the association for more information.

With the possible exception of chess, no game in the world is more popular than bridge. It is a game of skill, strategy, and luck, and it has captured the attention of players around the world. The New South Wales Bridge Association is dedicated to promoting the game and providing opportunities for players to come together and enjoy the fun. If you are interested in learning more about the game or just having fun, please contact the association for more information.

Pope Declares Moon Is Catholic

VATICAN CITY, May 2—His Holiness, the Pope, has declared spiritual leaders all over the world with his latest proclamation. His Holiness has revealed that, according to latest Scientific Space Exploration reports, the moon is inhabited exclusively by Catholics.

What a happy surprise! His Holiness further stated that although no evidence had been discovered to suggest the existence of "broom regulars," Catholics themselves were not so disbelieving. Vatican emissaries are heading for the moon to investigate "Catholic Weekly" will publish its findings when further information comes to hand.

A spokesman for "NASA Indi- now, Ltd." said "Catholic Weekly" asserts last night that the discovery of a new Catholic world would lead to a new regime involving the leaders and hierarchy for the Holy Roman Catholic Church. He declared that it is likely that the Pope would be chosen as its head of state.

Miracle Making

A spokesman for the Sydney Bunch, His Grace the Late Cardinal Joseph Hubert Boyle, a former bishop of the Sydney Catholic Church, who died in 1956, is expected to make a crucial decision in the case of Blessed Leo Battismus, who was canonized in 1980 by Pope John XXIII.

Kinsella Shockeying

"Catholic Weekly" editors were unable to contact Billy Graham last night as he was presently traveling. It is ex-
